Biodegradable PLA beads combining dimensional regularity and trajectory stability.

BLS Precision BIO 6mm airsoft BBs, in a bottle of 3,400, are made of biodegradable PLA. Their stated dimensional tolerance of ±0.01mm helps maintain consistent accuracy and a stable trajectory, even at long range. Four weights are available: 0.25g, 0.28g, 0.30g, and 0.32g. This selection allows you to match the BB weight to the characteristics and settings of your airsoft replica. Compatible with standard and slightly modified airsoft replicas, they are suitable for both regular games and use on fields requiring biodegradable ammunition. The resealable bottle contains approximately 3,400 BBs and facilitates storage between games.

- **Brand:** BLS Precision
- **Product range:** BIO Precision
- **Type:** biodegradable airsoft pellets
- **Diameter:** 6 mm
- **Advertised tolerance:** ± 0.01 mm
- **Material:** Biodegradable PLA
- **Available weights:** 0.25, 0.28, 0.30 and 0.32 g
- **Quantity:** approximately 3,400 marbles
- **Packaging:** resealable bottle
- **Compatibility:** Standard and slightly improved airsoft replicas
- **Contents:** one bottle of airsoft BBs

Biodegradable PLA airsoft BBs

BLS Precision BIO 6mm BBs are made from **biodegradable PLA** . This renewable material is designed to degrade gradually under suitable conditions. It meets the needs of players who are mindful of the environmental regulations applied on their airsoft field.

A dimensional tolerance of ± 0.01 mm

The stated tolerance of **± 0.01 mm** limits dimensional variations between the pellets. This consistency helps maintain a stable trajectory and consistent accuracy. It is particularly important when the shooting distance increases and deviations become more noticeable.

Four weights for different settings

The range includes BBs in weights **of 0.25g** , **0.28g** , **0.30g** , and **0.32g** . The choice should take into account the replica's characteristics, its settings, and the manufacturer's recommendations. These BBs are intended for standard and slightly modified airsoft replicas.

A resealable bottle containing 3,400 marbles

Each bottle contains approximately **3,400 airsoft BBs** . Its resealable packaging facilitates storage between uses and allows a large quantity of BBs to be kept in the same container.

FAQ

Are the four weights mixed together in the bottle?

No. Each bottle contains approximately 3,400 marbles of a single weight, to be selected from the four available variants.

Are these BBs suitable for precision guns?

Yes, provided that the manufacturer's recommendations for the replica and the barrel are followed. Their tight dimensional tolerances facilitate this compatibility.

Can these marbles be used on an outdoor field?

Yes. Their manufacture in biodegradable PLA meets the requirements of fields that mandate the use of BIO pellets.
