Complete CNC upgrade for Glock 19 GBB with RMR optic compatibility.

The **Lancer Tactical Arc Division Reactor Glock 19 GBB Slide Kit** is a complete slide kit designed for **Glock 19 GBB Gen 3 / Gen 4** replicas. Made from CNC aluminum, it improves the aesthetics, responsiveness, and optical compatibility of the replica.

- **Compatibility:** Elite Force / Umarex Glock 19 GBB Gen 3 / Gen 4
- **Construction:** CNC aluminum
- **Replica:** 1:1 reproduction Arc Division Reactor
- **External Canon:** ported style
- **Optics:** RMR mounting plate included
- **Sights:** rear and front sights, height suppressor
- **Color:** black
- **Type:** Complete GBB cylinder head kit
- **Contents:** bolt, outer barrel, back plate, RMR plate, RMR plate cover, extractor, sights

A premium slide kit for Glock 19 GBB replicas

This kit is designed for **airsoft** players looking to upgrade their **Gen 3/Gen 4 Glock 19 GBB** replica. Inspired by the famous **Arc Division Reactor** slide, it combines an aggressive aesthetic with mechanical optimization. Once installed, it transforms the replica's appearance and responsiveness while maintaining smooth operation.

CNC machined aluminum

The cylinder head is **CNC-machined from aluminum** , a process that guarantees precision and robustness. This construction offers an excellent compromise between strength and weight, allowing for a fast and consistent cycle during **gas blowback** operation. The visual appearance is also more realistic and high-end.

Reactor design with ported external cannon

The design faithfully replicates the **Arc Division Reactor** configuration with characteristic cutouts on the bolt. Combined with the **ported outer barrel** , this assembly reduces the bolt's moving mass, which can improve cycle speed and the feel of firing during rapid bursts in-game.

Modern optical configuration

The receiver is **optics-ready** thanks to an included **RMR mounting plate** . This allows players to easily install a micro red dot sight to improve target acquisition. The **height suppressor sights** enable co-witness with the optic mounted, ensuring a reliable aiming solution even if the optic fails.

Simple drop-in installation

The kit is designed for easy installation on **Elite Force / Umarex Glock 19 GBB Gen 3 / Gen 4** replicas. The **drop-in** configuration minimizes modifications and allows for quick transformation of the replica with a complete set including slide, outer barrel, and essential parts.

FAQ

Which replicas is this kit compatible with?

The kit is designed for Elite Force / Umarex Glock 19 GBB Gen 3 / Gen 4 replicas.

Does the kit allow for the installation of a red dot sight?

Yes, an RMR mounting plate is included to allow the installation of a compatible red dot microphone.

Does the installation require any modifications?

The kit is designed for drop-in installation on compatible Glock 19 GBB Gen 3 / Gen 4 pistols, which limits the modifications required.
