A premium CNC replica with advanced realism and high-end finishes.

The **TTI Ballerina CNC** is a high-end **GBB airsoft pistol** , designed with CNC components for increased performance and realism.

- **Type:** GBB airsoft gun (gas)
- **Cylinder head:** CNC machined aluminum with a bronze finish
- **Canon:** CNC threaded and fluted
- **System:** Gas blowback
- **Capacity:** Extended magazine (increased gas)
- **Organs:** RMR compatible (optics ready)
- **Security:** Built-in security
- **Controls:** Ambidextrous bolt stop
- **Construction:** Internal steel parts

A high-end CNC replica licensed by TTI

The **TTI Ballerina** immediately stands out thanks to its **CNC-machined aluminum slide** with a **coyote bronze** finish. The result is both visually and tactilely appealing - this is clearly a premium replica, true to the **Taran Tactical** universe.

Performance and realism in GBB

The **GBB (Gas Blowback)** system offers a realistic cycle with recoil on every shot. The internal assembly, including a **steel hammer group** , ensures robustness and durability. In practice, the feel is crisp, with good responsiveness to each trigger pull.

Modern and customizable configuration

The bolt is machined with an **RMR** cutout, allowing for the installation of a red dot sight while retaining the original sights. The **threaded barrel** and simulated compensator provide both style and consistency with modern platforms.

Optimized ergonomics and handling

The grip features **manual stippling** for excellent handling. The **TTI magwell** facilitates rapid reloading, while ambidextrous controls improve accessibility for all users.

Optimized charger and increased battery life

The extended magazine has an increased gas capacity of approximately **30%** , allowing for longer firing times without frequent reloading. A real advantage in games or training.

FAQ

Is this model compatible with RMR optics?

Yes, the cylinder head is machined with an RMR cutout allowing the installation of a red dot sight.

What type of mechanism does this airsoft gun use?

It operates on gas with a blowback system (GBB) simulating the recoil of the slide.

What are the advantages of the extended charger?

It offers superior gas capacity, allowing for increased autonomy and the number of shots per refill.
