A premium black CNC replica with advanced realism and performance.

The **TTI Ballerina CNC** in **Black** finish is a high-end **GBB airsoft pistol** , combining realism, performance and CNC design.

- **Type:** GBB airsoft gun (gas)
- **Cylinder head:** CNC machined aluminum with a black finish
- **Canon:** CNC threaded and fluted
- **System:** Gas blowback
- **Capacity:** Extended high-capacity gas charger
- **Organs:** RMR compatible (optics ready)
- **Security:** Built-in security
- **Controls:** Ambidextrous bolt stop
- **Construction:** Steel hammer group

A sleek and premium black version

The **TTI Ballerina** in black offers a more understated look while retaining the premium DNA of the bronze version. The **CNC-machined aluminum slide** ensures excellent rigidity and smooth cycling, with a realistic feel on every shot.

A responsive and immersive GBB system

The **gas blowback** mechanism provides significant recoil and a realistic experience. The **steel hammer assembly** enhances durability, while the mechanics remain smooth even at high rates of fire.

Modern and scalable configuration

The receiver incorporates an **RMR** cutout allowing the addition of a red dot sight while retaining the iron sights. The **threaded barrel** and simulated compensator enhance the replica's style and modularity.

Ergonomics optimized for gaming

The grip with **manual stippling** provides excellent traction. The **TTI magwell** facilitates rapid reloads, and the ambidextrous controls improve handling for all types of users.

Enhanced autonomy

The extended magazine benefits from an increased gas capacity of approximately **30%** . In practice, this allows for more shots to be fired in quick succession without any loss of performance - a real advantage in a game.

FAQ

Does this model accept a red dot sight?

Yes, the cylinder head is machined to accommodate an RMR optic.

What type of gas should I use?

It works with standard airsoft gas (green gas or equivalent depending on conditions).

Is the charger high capacity?

Yes, it has an increased gas capacity for better autonomy.
