A lightweight and intuitive CO2 rifle for dynamic recreational shooting.

The **Beeman Rattler QB76** in **4.5 mm** is a **CO2 rifle** designed for recreational shooting with immediate handling.
Its multi-shot system and lightweight design make it an ideal ally for smooth and unconstrained sessions.

- **Caliber:** 4.5 mm (.177)
- **Speed:** 168 m/s
- **Magazine capacity:** 8 rounds
- **Power supply:** 12g CO2 cartridge
- **Rail:** 3/8" dovetail + Picatinny
- **Sights:** Adjustable rear sight
- **Stock:** Lightweight synthetic thumbhole, 35.5 cm
- **Bonus:** 2 chargers with integrated storage

An accessible and fun CO2 rifle

In **4.5 mm** caliber, this **CO2 rifle** is clearly designed for recreational shooting. Easy to handle, it allows for effortless rapid-fire shooting - typically the kind of model chosen for enjoying target practice without complex preparation.

Practical multi-shot system

Thanks to its **8-round magazine** , rapid-fire sequences are smooth. Even better, two magazines are supplied with **storage integrated directly into the stock** - a simple detail, but truly practical in the field.

Lightweight and modern ergonomics

The **thumbhole stock** provides good stability while maintaining a low weight. The openwork design improves grip, and this feeling of lightness is appreciated during long sessions.

Extended optical compatibility

The dual **3/8" and Picatinny rails** allow for easy mounting of a scope or red dot sight. This opens the door to different configurations depending on your shooting preferences.

- **Use:** Recreational shooting, plinking
- **Operation:** Semi-repetition with CO2
- **Maintenance:** Simple, suitable for beginners

FAQ

What type of CO2 cartridge should I use?

This rifle operates with standard 12-gram CO2 cartridges, which are easy to find and replace.

Can a scope be mounted on it?

Yes, it has a 3/8" rail on top and Picatinny for bipod, laser... on the bottom, allowing the installation of various optics according to your needs.

What kind of maintenance should be planned?

Cleaning the barrel and occasionally using silicone oil for the CO2 seals are sufficient to ensure proper operation.
