Sustained pace and optimized mobility for in-game support.

The **WELL WE23-L** is a compact **Minigun airsoft replica** designed for suppression fire and dynamic play.
Its electrical system and high-capacity charger offer smooth and continuous use in the field.

- **Energy:** 0.78 J
- **Speed:** 250 FPS (0.20 g)
- **Magazine capacity:** 1200 BBs
- **Firing mode:** Automatic
- **Hop-up:** Adjustable
- **Internal barrel:** 190 mm - 6.03 mm
- **Gearbox:** Dedicated version
- **Power supply:** Battery not included (T-connector)
- **Material:** Reinforced polymer
- **Weight:** 4800 g

A compact and dynamic Minigun replica

Inspired by **Gatling gun** systems, the **WELL WE23-L** features a **four-barrel rotating** configuration. In the field, this translates to a high rate of fire (up to approximately 29 rounds per second), ideal for covering fire and area control.

Lightweight and sturdy design

The choice of a **reinforced polymer** allows for good resistance while partially reducing fatigue. Despite its support-oriented design, it remains maneuverable - a key point for fast movements.

Ergonomics designed for action

The **chainsaw-** style handle offers an intuitive grip. Side **Picatinny rails** and the **M-LOK** interface allow for easy addition of accessories (lamp, laser, handle) to adapt the configuration to each

scenario.

Reliable electrical mechanism

The **dedicated gearbox** , combined with a polymer piston system, ensures smooth operation. The **adjustable hop-up** allows you to optimize the trajectory depending on the BBs used (0.23g to 0.25g recommended).

- **Rate of fire:** Approximately 27 to 29 balls per second
- **Charger type:** Box with viewing window
- **Length:** 515 mm
- **Serial number:** Yes
- **EAN:** 5904420017004

A tactical advantage in a team

Designed for **support in airsoft** , this replica allows you to pin down the opponent, cover their movements, and create openings. In practice, it's the kind of equipment that sets the pace for a well-organized team.

FAQ

Which battery should I use?

An 11.1V LiPo battery with a T connector is recommended to fully utilize the rate of fire.

What type of marbles should be preferred?

BBs weighing 0.23g to 0.25g offer a good compromise between range, stability and accuracy.

Is this replica suitable for long games?

Yes, its design and high-capacity charger make it particularly suitable for support roles over extended sessions.
