Compact size and extreme rate of fire for CQB support.

The **WELL PRO WE23-MINI** is a compact **airsoft Minigun replica** designed for close-range suppression shooting.
With its high rate of fire and compact size, it combines mobility and firepower.

- **Energy:** 0.78 J
- **Speed:** 260 FPS (0.20 g)
- **Magazine capacity:** 600 BBs
- **Firing mode:** Automatic
- **Hop-up:** Adjustable
- **Internal barrel:** 180 mm - 6.03 mm
- **Gearbox:** Dedicated version with 8mm steel bearings
- **Power supply:** Battery not included (T-connector)
- **Materials:** Metal and polymer
- **Dimensions:** 440 mm / 230 mm

A compact minigun for CQB

The **WELL PRO WE23-MINI** captures the spirit of **Gatling** guns in a compact format. In practice, it's a replica designed for confined environments: rapid movement, tight angles... and the ability to instantly saturate an area.

High cadence and tactical impact

With a rate of fire of up to approximately **36 BBs per second** , this **Minigun replica** allows for effective covering fire. On the field, this translates into immediate control of the axes and constant pressure on the opponent.

Robust and mobile design

The **metal and reinforced polymer** blend ensures strength and durability, while maintaining a manageable size. The **folding stock** further enhances this versatility: compact when moving, stable when firing.

Modularity and customization

The top **Picatinny rail** allows for easy addition of optics or a red dot sight. The **M-LOK** handguard offers numerous accessory options (lamp, laser, grip) to adapt the configuration to any scenario.

Reliable mechanics for heavy-duty use

The **dedicated gearbox** with steel gears and 8mm bearings ensures good durability. The **adjustable hop-up** allows you to optimize accuracy depending on the BBs used (0.23g to 0.25g recommended).

- **Rate of fire:** Up to 36 balls/second
- **Charger type:** Polymer box with viewing window
- **Use:** CQB, close support
- **Serial number:** Yes
- **EAN:** 5904420018469

An agile support solution

Ideal for **mobile support** roles, this replica allows you to cover a team while remaining agile. It's exactly the kind of equipment that makes a difference in fast-paced offensive situations.

FAQ

Which battery should I use?

A LiPo battery with a T connector is recommended, ideally 11.1V to fully exploit the cadence.

What is the difference compared to a standard version?

The MINI version is more compact and maneuverable, particularly suited to CQB environments and rapid movements.

What type of marbles should I use?

BBs weighing 0.23g to 0.25g are recommended for a good compromise between range and stability.
