Extreme power and clean operation for high-performance GBB.

The **NUPROL Airsoft Gas 4.ZERO 300g** is a silicone-free high-pressure gas designed for demanding GBB platforms and reinforced configurations.

- **Pressure:** Ultra-high (grade 4.ZERO)
- **Contents:** 300 g
- **Formulation:** Silicone-free
- **Technology:** Trace additive expansion system
- **Compatibility:** Heavy Bolt, DMR, High Mass GBB
- **Performance:** Stability in cold conditions
- **Usage:** Manual lubrication required

High-pressure gas for demanding platforms

Designed for high-inertia replicas, this **ultra-high-pressure** gas ensures reliable cycling even with heavy moving parts. In practice, on a steel bolt-action or reinforced GBB, you immediately feel improved responsiveness and a crisp, powerful recoil with every shot.

Silicone-free formula: cleanliness and precision

The absence of silicone ensures a clean internal environment, which is particularly beneficial for **precision barrels** and optimized hop-up systems. This allows technicians to manage lubrication themselves, without unwanted deposits.

Controlled expansion and consistent FPS

The **additive trace** system improves gas expansion with each cycle. The result: stable pressure, even at high speeds or in low temperatures. This translates into a more consistent trajectory and predictable behavior.

Suitable for difficult conditions

Whether in winter or during intensive use, this gas maintains consistent performance. It is typically the choice of demanding users seeking uncompromising power and reliability.

Additional features

- **Gas type:** Airsoft-optimized propane

- **Use:** High-performance GBB replicas
- **Format:** Standard field/workshop bottle
- **Maintenance:** Requires regular external lubrication

FAQ

Is this gas compatible with all GBB replicas?

No, it is intended for robust and reinforced replicas. Using it on standard models may cause premature wear.

Why choose a silicone-free gas?

It helps to keep the internal system clean and optimize performance, especially on precision guns, while allowing the user to manage lubrication.

Does this gas work in winter?

Yes, its formulation ensures stable pressure and reliable operation even in cold conditions.
