A compact and ultra-responsive HPA regulator designed for demanding airsoft setups.

The SAC Beast HPA Regulator Black is a compact, high-performance **airsoft HPA regulator** designed to deliver stable pressure and excellent responsiveness on **HPA** setups. Made in Europe from CNC-machined 7075-T6 aluminum, it combines robustness, precision, and simplified maintenance.

- **Body:** 7075-T6 CNC Aluminum
- **Internal components:** High-quality stainless steel and bronze
- **Dimensions:** Approximately 25 × 56 mm
- **Outlet pressure:** 50 to 200 psi (3 to 14 bar)
- **Power supply:** G1/2" input
- **Piston bore:** 4.5 mm
- **QD Connection:** US Standard
- **Tournament lock:** Integrated
- **Pressure gauge:** Outlet pressure
- **Seals:** 3 O-rings

An HPA controller designed for modern configurations

Compact, discreet, and exceptionally effective, the **Beast HPA Regulator Black SAC** fits easily into virtually any **HPA airsoft** setup. Its small size makes it easy to integrate into fast-paced Speedsoft configurations as well as builds more oriented towards **DMR** or Woodland.

In-game, its stability is immediately apparent. Even during fast-paced sequences or changes of rhythm, the pressure remains constant and the responsiveness particularly sharp. It's exactly the kind of component that provides a real sense of control over the replica.

High throughput and excellent responsiveness

The regulator uses a piston with a 4.5 mm bore to provide a high airflow and extremely fast response. This design ensures consistent performance even with high rates of fire or under heavy loads.

The pressure setting covers a wide range from approximately 50 to 200 psi (3 to 14 bar), allowing for precise adjustment of power according to configuration requirements or field limitations.

- **Responsiveness:** Very fast
- **Flow rate:** High flow
- **Pressure setting:** Adjustable
- **Compatibility:** HPA Airsoft and Paintball

Robust CNC manufacturing and simplified maintenance

The CNC-machined 7075-T6 aluminum body ensures excellent mechanical strength while minimizing weight. High-quality stainless steel and bronze internal components enhance the system's overall reliability and contribute to smooth operation.

Another particularly valuable feature is the quick and easy maintenance, thanks to an architecture using only three O-rings. This reduces the risk of failure and simplifies long-term maintenance.

Tournament Lock integrated

The system directly incorporates a pressure adjustment lock via a sliding ring compatible with a cable-type clamp. This solution eliminates the need for additional parts and allows for quick and secure adjustments during games or competitions.

Compatible with standard HPA systems

The **SAC Beast HPA Regulator Black** is compatible with standard HP cylinders equipped with a G1/2" thread, in both ON/OFF and Pin Valve versions. Its US quick-connect fitting also allows for easy integration with most **HPA** hoses on the market.

The kit also includes a set of springs to adjust the pressure range, a specific adjustment tool and a 1.5 mm Allen key.

FAQ

Is this regulator compatible with standard HPA bottles?

Yes, it is compatible with HP bottles equipped with a G1/2" thread, in ON/OFF or Pin Valve configuration.

What is the advantage of a high-flow regulator?

A high flow rate helps maintain a stable and responsive air supply, even during high rates of fire or on high-performance HPA configurations.

Does the regulator have a tournament locking system?

Yes, an integrated Tournament Lock system allows you to easily secure the pressure setting using a cable-type collar.
