A compact and responsive airsoft replica designed for demanding players in CQB as well as mixed terrain.

The SLR Rifleworks LT Gen 2 SD9 is a compact and versatile **AEG airsoft** replica developed by **Lancer Tactical** , ideal for dynamic games in CQB or outdoor environments. Its short length, officially licensed SLR handguard, and ready-to-play features offer excellent handling right out of the box.

- **Material:** Reinforced polymer

- **Power:** 1 Joule with 0.20g BBs
- **Internal barrel:** 6.03 mm Tight Bore
- **Hop-up:** Adjustable rotary type
- **Stock:** Adjustable NSR compatible with large batteries
- **Rail:** Superior monolithic Picatinny
- **Controls:** Ambidextrous
- **System:** Quick spring change
- **Power supply:** Rechargeable battery included
- **Included accessories:** Battery and charger
- **Color:** Black

A compact configuration designed for the field

With its short and balanced SD format, this **airsoft AEG** replica offers excellent mobility during rapid movements or close-quarters engagements. Its compact size is immediately appreciated in narrow corridors, buildings, or urban areas. The officially licensed **SLR Rifleworks** handguard provides a modern finish and a particularly realistic style.

Canon Tight Bore 6.03 mm for greater precision

The **6.03 mm Tight Bore** inner barrel improves shot stability and promotes more consistent trajectories. Combined with the adjustable rotary hop-up, it allows for precise tuning based on the BB weight used. This is exactly the kind of setup players look for to gain consistency without having to immediately modify their airsoft gun.

Modern ergonomics and ambidextrous controls

This Gen 2 platform features ambidextrous controls and a charging handle suitable for both right- and left-handed shooters. The functional bolt lock allows for quick access to the hop-up unit, making adjustments easier in the field, even between rounds.

Monolithic Picatinny rail

The monolithic top rail allows for the mounting of a wide variety of accessories: red dot sights, magnifiers, tactical modules, or folding mechanical components. This modularity is particularly appreciated by players wishing to customize their equipment to their play style.

NSR stock compatible with large batteries

The NSR adjustable stock offers good shoulder comfort and accepts higher-capacity batteries. In other words, this allows for longer gaming sessions without constantly changing power sources. The included battery and charger allow for immediate use upon arrival.

Lightweight and sturdy design

The billet-type polymer body reduces the replica's overall weight while maintaining good rigidity. This compromise between lightness and strength significantly improves comfort during long days of airsoft, especially for mobile players who prioritize responsiveness.

- **Style:** Compact SD SLR
- **Use:** CQB and mixed terrain
- **Compatibility:** Picatinny Accessories
- **Handling:** Ambidextrous
- **Spring change:** Quick
- **Package:** Battery + charger included

FAQ

Is this replica ready to play right out of the box?

Yes, the rechargeable battery and charger are included, allowing for immediate use after charging.

Is this model suitable for CQB play?

Yes, its compact size and good maneuverability make it particularly suitable for CQB environments and rapid movements.

Can a sight or tactical accessories be installed?

Yes, the top Picatinny rail allows for easy mounting of a red dot sight, a compact scope, or various compatible accessories.
