A compact and responsive airsoft replica with a modern bronze look, designed for intensive tactical play.

The **Lancer Tactical MGC4 MK3 M4 AEG Bronze** is a full-metal, SBR-format **electric airsoft** replica designed for maneuverability, responsiveness, and advanced customization. Its distinctive bronze finish and reinforced internal components make it a high-performance platform equally effective in CQB and outdoor environments.

- **Energy:** 1 Joule
- **Magazine capacity:** 130 BBs
- **Body:** Full metal billet
- **Rail:** M-LOK 9.5 inches
- **Internal barrel:** 6.03 mm Tight Bore
- **Motor:** NEO High Torque 25K
- **MOSFET:** Nebula2 programmable optical sensor
- **Hop-Up Unit:** New TDC Hop-Up Unit Best Flight Performance Sky Blue, improving tuning and accuracy
- **Gear set:** Steel 16:1
- **Hop-up:** Rotary
- **Trigger:** Blade Trigger plate
- **Controls:** Ambidextrous
- **Spring system:** Quick Change Spring
- **Sights:** Flip-up front and rear
- **Included accessories:** Dummy metal QD sound moderator
- **Color:** Bronze

A compact and ultra-maneuverable SBR platform

The **Lancer Tactical MGC4 MK3** adopts an SBR format particularly appreciated for rapid movements and close-quarters engagements. Its compact size improves fluidity of movement while maintaining excellent stability when firing on the move.

The 9.5-inch M-LOK rail offers ample space for mounting **airsoft optics** , a tactical grip, or lighting, depending on the player's needs. This modularity allows for easy customization of the setup for both CQB and outdoor fields.

Bronze finish and full metal construction

The bronze finish immediately gives the replica a more modern and aggressive look. Combined with the full metal billet receiver, it enhances the realism and overall robustness of the replica.

Ambidextrous controls facilitate quick handling and improve user comfort regardless of dominant hand. The next-generation NSR stock also offers more space for LiPo batteries.

Internal components optimized for responsiveness

This MK3 version receives several internal improvements designed to increase speed and mechanical reliability. The 16:1 steel gears ensure a fast cycle time while maintaining excellent wear resistance.

The NEO High Torque 25K motor delivers a snappy rebound response while the Nebula2 optical sensor programmable MOSFET improves smooth operation and simplifies internal evolutions.

The 6.03 mm Tight Bore inner barrel and the rotary hop-up contribute to better shot consistency and increased accuracy at medium range.

A tactical setup ready to evolve

The suppressor-compatible flash hider, combined with the included dummy QD sound moderator, enhances the tactical look of this platform. The assembly maintains excellent balance, even with multiple accessories installed.

- **Compatibility:** M-LOK and Picatinny accessories
- **Responsiveness:** Low resistance cabling
- **Programming:** Advanced Nebula2 MOSFET
- **Maintenance:** Quick spring replacement
- **Style:** Modern SBR configuration
- **Use:** Airsoft CQB and outdoor field

FAQ

Is this replica suitable for CQB gameplay?

Yes, its compact SBR format and high maneuverability make it perfectly suited to CQB environments and rapid movements.

Does the supplied silencer reduce noise?

The QD sound moderator provided is a dummy model intended primarily for the aesthetics and realism of the airsoft replica.

Does the Nebula2 MOSFET allow for advanced settings?

Yes, the programmable Nebula2 MOSFET allows for different electronic configurations to optimize the responsiveness and performance of the replica.
