Compact, lightweight, and quick to acquire, this **Lancer Tactical red dot sight** is designed for players seeking an effective solution for close-quarters combat. In CQB, where every fraction of a second counts, its rapid acquisition and small size are immediately appreciated.

Compact format for CQB

Thanks to its low profile, this **red dot reflex** sight easily integrates onto a replica equipped with a Picatinny rail. Its discreet size minimizes bulk while maintaining a comfortable sighting window for quickly tracking a moving target.

Reinforced aluminum construction

The **reinforced aluminum** body provides greater resistance to handling and the stresses encountered in the field. This design keeps the weight down while ensuring good durability during regular use.

Precise settings and accessible controls

The sight features windage and elevation adjustments to precisely set the point of impact according to the configuration used. Rubberized control buttons on either side improve user comfort, even with gloves.

Compatible with many platforms

Supplied with a Picatinny mount, this model can also be installed on certain compatible platforms with a suitable optical plate. Its operation via a CR2032 battery allows for quick power replacement.

- **Use:** CQB airsoft and dynamic shooting
- **Mounting included:** Picatinny bracket
