A complete Gen 4 gearbox equipped with the GATE ASTER V2 SE electronic system for advanced performance.

The **Lancer Tactical Gearbox Gen4 M4 ASTER** is a complete, ready-to-install AEG gearbox, equipped with the **GATE ASTER V2 SE** electronic system. Designed for M4 platforms, it improves the responsiveness, reliability, and customization options of your replica.

- **Platform:** M4 AEG
- **Version:** Complete Gen 4 Gearbox
- **Electronic system:** GATE ASTER V2 SE pre-installed
- **Sensor:** Optical trigger detection
- **MOSFET:** Integrated
- **Firing modes:** Programmable
- **Active braking:** Yes
- **Battery protection:** Yes
- **Engine diagnostics:** Yes
- **Connector:** Deans
- **Compatibility:** Standard AEG M4 receivers
- **Color:** Black

A complete gearbox ready to install

The **Lancer Tactical Gearbox Gen4 M4 ASTER** is an ideal solution for replacing a worn gearbox or upgrading an M4 AEG platform. Delivered fully assembled, it allows you to quickly benefit from the latest electronic technologies without having to perform complex component-by-component assembly.

The GATE ASTER V2 SE system at the heart of performance

Pre-installed at the factory, the **GATE ASTER V2 SE** replaces traditional mechanical contacts with a highly responsive optical detection system. This technology improves trigger speed while minimizing wear on electrical components. The result is immediately noticeable during rapid fire or engagements requiring excellent responsiveness.

High-precision optical trigger sensor

The optical system analyzes trigger movements with high precision. This technology results in a crisper trigger pull, improved consistency, and greater control over the firing cycle. This responsiveness is particularly appreciated during dynamic games where every fraction of a second counts.

Advanced programming of firing modes

Thanks to the GATE ASTER's features, several firing configurations can be set up according to the user's preferences. The customization options allow the replica's behavior to be adapted to different playing styles while maintaining ease of use.

Integrated MOSFET and electronic protections

The integrated MOSFET optimizes energy transfer between the battery and the motor while protecting the electronic components. Onboard monitoring functions help preserve the mechanical components during intensive use and facilitate diagnostics in case of malfunctions.

Designed for durability

The reinforced Gen 4 hull was developed to withstand the stresses of modern configurations. Combined with advanced electronic features, it provides an excellent base for customization projects or repairs to M4 platforms.

- **Detection:** Optical sensors without mechanical contact
- **Programming:** Configurable firing parameters
- **Active braking:** Optimized engine shutdown management
- **Connector:** High-efficiency Deans
- **Protection:** Battery and motor monitoring
- **Installation:** Compatible with standard M4 AEG receivers
- **Use:** Gearbox upgrade or replacement

A high-performance base for modern M4 platforms

Whether it's to improve the responsiveness of an existing replica or to finalize a custom build, this complete gearbox offers a particularly appealing combination of mechanical robustness and advanced electronics. It meets the expectations of players seeking greater control, reliability, and consistency on the field.

FAQ

Is this gearbox compatible with all M4 AEG replicas?

It is designed for standard M4 AEG receivers compatible with Version 2 type gearboxes.

Is the GATE ASTER system already installed?

Yes, the GATE ASTER V2 SE comes pre-installed in this complete gearbox.

What type of connector is used?

The gearbox is equipped with a Deans connector allowing for optimized energy transfer.
