Premium biodegradable marbles offering precision, consistency and respect for the environment.

BLS BIO BBs 0.45g White 1000 pcs are made from biodegradable PLA based on corn starch and benefit from the expertise of the BLS Precision range. Their high-precision manufacturing guarantees smooth feeding and consistent performance on the most demanding airsoft replicas.

- **Weight:** 0.45 g
- **Packaging:** bag of 1000 marbles
- **Color:** white
- **Material:** Biodegradable PLA
- **Type:** BIO beads
- **Quantity:** 1000 pcs
- **Manufacturing:** high precision
- **Manufacturer reference:** 1BA-PLA45

A heavy ball bearing for demanding configurations

When precision is paramount, the choice of BB weight becomes crucial. **BLS BIO 0.45g White BBs (1000 pcs)** offer excellent flight stability thanks to their high mass. They are particularly well-suited to airsoft replicas properly tuned to use heavy BBs and maintain a consistent trajectory even at long range.

Precision BLS expertise

The **Precision BLS** range is renowned for its extremely tight manufacturing tolerances. Each BB has a consistent sphericity, ensuring smooth passage through magazines, hop-up chambers, and precision barrels. In practice, this quality translates into more consistent groupings and noticeable performance during the most demanding games.

An environmentally friendly design

Made from PLA derived primarily from corn starch, these **biodegradable BBs** offer a suitable alternative for fields requiring environmentally friendly consumables. The material decomposes naturally in the soil over time, thus reducing the environmental impact associated with outdoor

airsoft.

Versatility of use

Although designed for precision setups, these BBs can be used in various platforms compatible with 6mm BBs. Their manufacturing quality ensures reliable feeding in electric and gas-powered replicas properly configured for this BB weight.

Additional features

- **Manufacturer code:** 1BA-PLA45
- **Origin of the polymer:** corn starch
- **Product line:** Precision BLS
- **Use:** outdoor airsoft and precision
- **Type:** non-traceable

FAQ

Are these beads biodegradable?

Yes, they are made from biodegradable PLA derived from corn starch and are designed to degrade naturally in the environment.

What type of replica is a 0.45g weight suitable for?

This weight is generally used on properly tuned precision airsoft replicas to obtain better trajectory stability and optimized range.

Are these BBs compatible with electric and gas-powered replicas?

Yes, they can be used in airsoft replicas compatible with 6mm BBs, including electric and gas models adapted to this BB weight.
