LE1043	Sig Sauer Custom PF MPX JW TTI Carbon 6mm	Vente libre	100	92.5	3200	Electrical	870.00 € incl. tax

A premium replica with a carbon look, officially licensed by TTI.

The **Sig Sauer Custom PF MPX JW TTI Carbon S-AEG 6mm** combines a **carbon fiber handguard**, a **CNC aluminum receiver**, and a **VFC Avalon V2 gearbox** with integrated MOSFET. Faithful to the original model under license from **Taran Tactical Innovations**, it offers realism, performance, and high-end ergonomics for **airsoft**.

- **Type:** Airsoft S-AEG Replica
- **Caliber:** 6 mm BB
- **Energy:** < 1.3 J
- **Magazine capacity:** 100 BBs
- **Gearbox:** VFC Avalon V2 + ECS
- **MOSFET:** Yes, integrated
- **Canon:** Smooth
- **Thread:** 14 mm CCW
- **Hop-Up:** Adjustable
- **Rail:** 22mm Picatinny + M-LOK
- **Finish:** Carbon-look handguard
- **Battery:** Not included
- **Connector:** Mini Tamiya
- **Recommended weight of the marbles:** 0.25 g
- **Length:** 845 to 925 mm
- **Weight:** 3200 g
- **Color:** Black

An exclusive Carbon finish

This **Carbon** version stands out with its **carbon fiber-look handguard** , which enhances the sporty character of this replica while retaining the iconic lines of the famous **JW3 TTI MPX** . The officially licensed markings and CNC-machined aluminum receiver offer a particularly realistic look.

A proven VFC Avalon mechanism

The heart of this replica lies in its **VFC Avalon V2 gearbox**, coupled with the ECS electronic system, an **integrated MOSFET** , reinforced bearings, and a high-performance neodymium magnet motor. This combination guarantees excellent responsiveness, a consistent rate of fire, and high reliability in use.

Modern ergonomics and ambidextrous controls

The platform features an ambidextrous charging handle with dual return springs, a fire selector, and a magazine release accessible from both sides. The **BCM AIR** pistol grip, the **BCM Air MOD 0 SOPMOD** stock mounted on a TTI adapter, and the QD attachments contribute to comfortable and rapid handling.

A scalable platform

The **M-LOK** metal handguard, complemented by a **22mm Picatinny** rail, allows for easy mounting of optics, a light, a laser, or a foregrip. The extended outer barrel features a **3-port compensator** , and the handguard can be removed for easy access to the battery compartment.

Performance tailored to the game

With an energy output of less than **1.3 joules** , an **adjustable hop-up** , and a **100-round** semi-transparent magazine, this replica offers excellent accuracy and reliable feeding. The quick-change spring system also allows for easy adjustment of the power to suit the needs or regulations of the playing field.

FAQ

Does this version have a MOSFET?

Yes. This Carbon version is equipped with an integrated MOSFET associated with VFC's ECS electronic system to improve responsiveness and electrical management.

Which battery should I use?

The battery is not included. The replica is equipped with a Mini Tamiya connector and the battery compartment is easily accessible thanks to the quick-release handguard.

What accessories can be installed?

The 22mm Picatinny rail, M-LOK interfaces and 14mm CCW thread allow for the installation of a wide range of airsoft compatible optics, grips, lights, lasers or muzzle devices.
