A high-performance, fast and customizable GBB pistol for sport airsoft.

The **Lancer Tactical LTX Competition GBB FDE/BLACK** combines a **metal slide** , a **polymer frame** , and **G-Spec internals** to deliver excellent responsiveness. Its adjustable **Top Dead Center Hop-Up** and compatibility with **TM Glock** standard accessories make it an upgradeable platform designed for demanding players.

- **Brand: Lancer Tactical**
- **Model: LTX Competition GBB FDE Black**
- **Type:** GBB (Gas Blowback) pistol
- **Carcass:** High-strength polymer
- **Cylinder head:** Metal
- **Firing modes:** Semi-automatic and automatic
- **Internal:** G-Spec
- **Hop-Up:** Adjustable Top Dead Center
- **Optical mount:** Compatible with RMR mounted on the barrel
- **Compatibility:** Accessories conform to the TM Glock standard
- **Speed:** 300 to 320 FPS
- **Color:** Dark Knight

A platform designed for performance

Developed by the team behind the **TP22** , this **GBB pistol** offers excellent responsiveness thanks to its realistic blowback system and **G-Spec** internal components. Its design prioritizes quick deployment and consistent performance during airsoft games.

Easily adjustable precision

The **Hop-Up Top Dead Center** allows for precise adjustment to optimize BB trajectory based on BB weight. This solution improves shot consistency and facilitates engagements at short and

medium ranges.

Designed for personalization

The **RMR mount, which** is directly installed on the barrel, allows for the quick addition of a red dot sight without significant modification. Compatibility with **Glock TM accessories** also opens up a wide range of upgrade parts and accessories available on the market.

Robust and ergonomic construction

The combination of a **polymer frame** and a **metal slide** provides an excellent balance between lightness, strength, and shooting feel. Its lower rail also allows for the mounting of a compatible tactical light or laser.

Using automatic mode

Like most gas-powered replicas, this model can be subject to the **Cool Down Effect** during prolonged use in automatic mode. To maintain optimal performance, it is recommended to use semi-automatic mode or short bursts, use magazines at room temperature, and avoid particularly cold playing conditions.

FAQ

Is this pistol compatible with TM Glock accessories?

Yes. This replica is compatible with many accessories and parts to the TM Glock standard, facilitating customizations and upgrades.

Can a red dot be installed?

Yes. The pistol has an RMR compatible mount fixed to the barrel, allowing the installation of a compatible red dot sight.

Why does performance decrease in automatic mode?

During long bursts, the cooling of the gas temporarily reduces its pressure (Cool Down Effect). Using it in semi-automatic mode or with short bursts helps maintain more consistent performance.
