AK AEG airsoft replica with programmable FE™ ETU, adjustable trigger and advanced performance.

The **ARCTURUS Advanced Tactical AK MOD1 FE™ airsoft replica** combines a **V3 gearbox** with quick spring changes and a **programmable ETU** offering multiple firing modes. Its construction of **steel** , **aluminum** , and **reinforced polymer** guarantees robustness, precision, and excellent responsiveness in-game.

- **Brand: ARCTURUS**
- **Model:** Advanced Tactical AK MOD1 FE™
- **Type: Airsoft** AEG replica
- **Gearbox:** Version 3 Quick Change Spring
- **ETU:** ARCTURUS V3 FE™ programmable
- **Materials:** Steel, CNC aluminum, and reinforced polymer
- **Gears:** CNC steel 18:1
- **Motor:** High Torque Neodymium 21T
- **Internal barrel:** 345 mm
- **External barrel:** 285 mm
- **Length:** 818 to 900 mm
- **Length with stock folded:** 608 mm
- **Weight:** 3238 to 3399 g
- **Hop-Up:** ARCTURUS RS™ Rotary reinforced
- **Magazine:** Variable-capacity 30/130 rounds
- **Battery:** 7.4V or 11.1V Deans LiPo/Li-Ion (not included)
- **Firing modes:** Safe, Semi, Full Auto, Programmable Burst, Programmable Binary
- **Performance:** Approximately 400 FPS (+/-10%)

An AK airsoft replica designed for demanding players

The **ARCTURUS Advanced Tactical AK MOD1 FE™** represents the 2024 evolution of the brand's AK platforms. It combines robust construction with modern electronics to deliver a particularly smooth gaming experience. From the first handling, one appreciates the rigidity of the steel body, the quality of the adjustments, and the excellent overall ergonomics.

ETU FE™: Fully programmable electronics

The **ARCTURUS V3 FE™ ETU** system allows for extensive customization of the **airsoft** replica's behavior. It includes, in particular:

- **Pre-cocking** adjustable to 7 levels.
- **Active Braking** with 8 levels.
- Adjustable **trigger sensitivity** in 5 positions.
- Adjustable **reset distance** with 5 levels.
- **Programmable firing modes** : Burst, Binary Trigger and Ramping.
- Battery **low voltage protection** .
- **Integrated electronic fuse.**

These settings allow you to precisely adapt the responsiveness of the replica according to the desired playing style.

Reinforced V3 gearbox and premium components

The Version 3 gearbox boasts a particularly refined design with a **Quick Change Spring** system, 18:1 CNC steel gears, a stainless steel cylinder, a reinforced piston head, a CNC nozzle with an O-ring seal, and a bearing-mounted spring guide. This assembly ensures excellent reliability while simplifying maintenance.

High torque motor and excellent responsiveness

The **ARCTURUS RS™ High Torque 21T** motor equipped with an MIM steel pinion offers a fast cycle, good energy efficiency and an instant trigger response, particularly appreciated during semi-automatic firing.

Precision and modularity

The **ARCTURUS RS™ rotating Hop-Up** unit ensures precise BB trajectory adjustment. The hard-anodized CNC aluminum handguard features **M-LOK** interfaces and a side Picatinny rail, allowing for the installation of numerous accessories to suit the player's needs.

Realistic construction

The all-steel QPQ-treated body, steel trigger, and fiber-reinforced polymer stock offer an excellent balance of robustness, realism, and user comfort. This level of finish makes this **airsoft** replica a particularly compelling model for regular players.

Box contents

- ARCTURUS Advanced Tactical AK MOD1 FE™ Replica
- Variable-capacity magazine 30/130 rounds
- Muzzle brake
- Deans to Mini-Tamiya Adapter
- Cleaning wand
- User manual

FAQ

What types of batteries are compatible?

This replica is compatible with 7.4V and 11.1V Li-Ion or LiPo batteries equipped with a Deans connector. The battery is not included.

Are the firing modes customizable?

Yes. The ETU FE™ allows you to program Burst, Binary Trigger, Ramping modes, pre-cocking, active brake and several trigger parameters.

Can the spring be easily replaced?

Yes. The Version 3 gearbox is equipped with a Quick Change Spring system allowing for quick spring replacement without complete disassembly of the mechanism.
