LE2031	ARCTURUS Airsoft Replica NEO MOD1 CQB 10.6	Vente libre	6 mm airsoft	350	28.8	78.7	Electrical	179.00 € incl. tax

Lightweight M4 airsoft replica with ME® MOSFET, V2 gearbox and 10.6" M-LOK handguard.

The **ARCTURUS NEO MOD1 CQB 10.6" ME® airsoft replica** combines a **V2 gearbox** with quick spring changes, an **integrated MOSFET**, and a **microswitch** trigger. Its **reinforced polymer** construction with metal inserts offers an excellent balance of lightness, robustness, and responsiveness.

- **Brand:** ARCTURUS
- **Model:** NEO MOD1 CQB 10.6" ME®
- **Type:** Airsoft AEG replica
- **Edition:** ARC ME™ MOSFET Enhanced
- **Gearbox:** Version 2 Microswitch with Quick Change Spring
- **MOSFET:** ARC ME™ In-Line
- **Materials:** High-strength polymer, aluminum, and steel
- **Gear ratios:** 18:1
- **Motor:** Ferrite Torque-Up 23T
- **Internal lens:** 280 mm
- **External lens:** 280 mm
- **Length:** 704 to 787 mm
- **Handguard:** 268 mm (10.6") with M-LOK interfaces
- **Magazine:** ARCTURUS AR MOD1 M4/M16 Windowed EMM 350 balls
- **Hop-Up:** ARCTURUS RS™ Rotary reinforced
- **Battery:** Li-Ion or LiPo 7.4V / 11.1V Deans (not included)
- **Firing modes:** Semi-automatic, Full Auto, Safe

An airsoft M4 replica designed for beginners without compromise

The **ARCTURUS NEO MOD1 CQB 10.6" ME®** is an **airsoft** platform developed to offer an excellent balance between performance, reliability, and ease of use. Its compact size facilitates movement in CQB situations while remaining versatile on more open terrain.

MOSFET ME™ and Microswitch detent

This version features the **ARC ME™ MOSFET Enhanced** system, a compact MOSFET integrated directly into the wiring harness. Combined with a microswitch trigger, it improves firing responsiveness while protecting the gearbox's electrical contacts.

The system is compatible with **LiPo batteries up to 3S (11.1V)** and accepts high-performance neodymium magnet motors for future upgrades to the replica.

Reinforced V2 Gearbox

The Version 2 gearbox features a **Quick Change Spring** system, facilitating spring replacement without complete disassembly. It also includes a CNC-machined stainless steel cylinder, a POM nozzle with an O-ring seal, and a QPQ-treated steel piston rack to ensure excellent long-term reliability.

Lightweight and robust platform

The high-strength polymer casing with molded metal inserts offers remarkable rigidity while minimizing the replica's weight. This design provides excellent comfort during long **airsoft** games.

10.6-inch M-LOK handguard

The reinforced polymer handguard incorporates **M-LOK** interfaces for attaching accessories such as a grip, light, or designator. Its CQB design improves maneuverability while maintaining a good gripping surface.

Precision Hop-Up

The **ARCTURUS RS™ Rotary Hop-Up** block ensures precise adjustment of the BB trajectory and helps to maintain good shot consistency.

Box contents

- ARCTURUS NEO MOD1 CQB 10.6" ME® Replica
- Rear magazine MOD1 M4/M16 Windowed EMM 350 balls
- ABUS folding sights
- Armor Tool
- Cleaning wand
- User manual

FAQ

What battery should I use with this replica?

This replica is compatible with 7.4V and 11.1V Li-Ion or LiPo batteries equipped with a Deans connector. The ME™ system also supports LiPo batteries up to 3S, in accordance with the manufacturer's recommendations.

What are the advantages of MOSFET ME™?

The MOSFET improves trigger responsiveness, protects the gearbox electrical contacts and allows the use of high-performance batteries while optimizing the reliability of the replica.

Can the spring be easily replaced?

Yes. The Version 2 gearbox features a Quick Change Spring system allowing for rapid spring changes during maintenance or power adjustments.
