The Performance Refined version with ARS-1 red dot and adjustable CNC Blowback Housing.

The **Osprey ARCTURUS 5" Split Slide Hi-Capa DG Performance Refined airsoft GBB pistol** comes with an **ARS-1 red dot** sight, an **ORS Optics Ready** slide, and an **adjustable CNC Blowback Housing** . Its **fixed barrel** , **split slide** , and compatibility with **Tokyo Marui Hi-Capa** kits provide a fast, accurate, and fully upgradeable **airsoft** replica.

- **Type:** GBB (Gas Blowback) pistol
- **Model:** Osprey 5" Split Slide Hi-Capa DG Performance Refined
- **Color:** Black
- **Total length:** 222 mm
- **Height:** 178 mm (with lens)
- **Inner barrel length:** 113 mm
- **Weight:** 975 g
- **System:** Gas Blowback
- **Firing mode:** Semi-automatic / Safe
- **Canon:** Fixed
- **Slide:** Split Slide ORS Optics Ready
- **Optics: ARCTURUS ARS-1** red dot sight included
- **Hop-Up Adjustment:** External, tool-free
- **Blowback Housing:** CNC adjustable aluminum GBB PR®
- **Compatibility:** Approximately 60% of parts and 100% of TM Hi-Capa compatible assemblies
- **Magazine:** 31-round gas magazine with ambidextrous ejection button
- **Supplied with:** ARS-1 red dot sight, mounting plate, 31-round gas magazine, O-rings, tools, cleaning rod and manual.

A ready-to-use Performance Refined version

The **Osprey ARCTURUS 5" Split Slide Hi-Capa GBB DG Performance Refined** represents the most refined version of the Osprey platform. Delivered with the **ARS-1 red dot** sight, an **ORS Optics Ready** slide, and an adjustable **CNC Blowback Housing** , this replica offers a high level of performance right out of the box, requiring no additional preparation.

Split Slide and fixed barrel: speed and precision

The **Split Slide** design significantly reduces moving mass to accelerate the bolt cycle. Combined with a **fixed barrel** , it ensures excellent barrel stability between shots, promoting remarkable consistency and high responsiveness during rapid follow-up.

Blowback Housing CNC GBB PR® adjustable

This edition features a **CNC-machined aluminum Blowback Housing** incorporating the **PR® GBB** system. Its adjustment allows for fine-tuning the gas flow timing to tailor the replica's performance to the player's preferences. This makes it possible to prioritize a higher rate of fire or greater gas efficiency, depending on the playing conditions.

A complete Optics Ready platform

The **ORS Optics Ready** bolt accepts **RMR** standard sights directly. An included adapter plate also allows mounting of **RMSc** and **DeltaPoint Pro** compatible optics. The included **ARS-1 red dot sight** is mounted on a fixed bracket, preventing adjustment changes caused by bolt movement.

External hop-up and heavy BBs

The **hop-up** is adjusted using an external dial accessible without disassembly. This design facilitates quick adjustments in the field and allows the use of BBs as light as **0.40g** to optimize range and trajectory stability.

A platform open to customizations

Compatible with approximately **60% of Tokyo Marui Hi-Capa parts** and **100% of Tokyo Marui Hi-Capa sets** , this replica provides an excellent base for players wishing to go even further in customization while enjoying an already highly refined mechanism.

FAQ

Is the ARS-1 red dot sight included with this version?

Yes. This edition comes with the ARCTURUS ARS-1 red dot sight as well as the mounting plate compatible with the ORS Optics Ready bolt.

What is the advantage of the adjustable CNC Blowback Housing?

The CNC aluminum GBB PR® Blowback Housing allows adjustment of the gas flow timing to optimize the replica's behavior according to the player's preferences, seeking more speed or better gas efficiency.

Can a CO? charger be used?

No. This replica is not directly compatible with CO? magazines. The manufacturer specifies that it is necessary to install the "Long Cutoff Delay Spacer" before using it with this type of magazine.
