The Performance Refined version with adjustable CNC Blowback Housing and Optics Ready cylinder head.

The **Osprey ARCTURUS 5" Split Slide Hi-Capa DG Performance Refined** airsoft GBB pistol combines a **split slide**, an **adjustable CNC blowback housing**, and an **ORS Optics Ready** interface compatible with a wide range of optics. Its **fixed barrel** and compatibility with **Tokyo Marui Hi-Capa** systems provide a fast, accurate, and upgradeable **airsoft** replica.

- **Type:** GBB (Gas Blowback) pistol
- **Model:** Osprey 5" Split Slide Hi-Capa DG Performance Refined
- **Color:** Black
- **Total length:** 222 mm
- **Height:** 157 mm
- **Inner barrel length:** 113 mm
- **Weight:** 941 g
- **System:** Gas Blowback
- **Firing mode:** Semi-automatic / Safe
- **Canon:** Fixed
- **Slide:** Split Slide ORS Optics Ready
- **Hop-Up Adjustment:** External, tool-free
- **Blowback Housing:** Adjustable CNC Aluminum GBB PR®
- **Compatibility:** Approximately 60% of Tokyo Marui Hi-Capa parts and 100% of sets are compatible.
- **Magazine:** Ambidextrous gas magazine, 31 rounds
- **Supplied with:** 31-shot gas magazine, mounting plate, O-rings, tools, cleaning rod and manual.

A Performance Refined platform designed to go further

The **ARCTURUS Osprey 5" Split Slide Hi-Capa GBB DG Performance Refined** retains the qualities of the Duty Grade series while adding components designed for players seeking more advanced tuning. This version maintains excellent accuracy, responsive mechanics, and a platform that is widely compatible with **Hi-Capa** standards.

Split Slide and Fixed Barrel

The **Split Slide** bolt reduces moving mass to accelerate the firing cycle and improve responsiveness. Combined with the **fixed barrel**, it ensures excellent trajectory consistency and consistent accuracy, particularly appreciated during rapid firing sequences.

Blowback Housing CNC GBB PR® adjustable

This edition features a **CNC-machined aluminum Blowback Housing** incorporating the **PR® GBB** system. Its adjustment allows the player to adapt the gas flow timing to their preferences in order to optimize the rate of fire, recoil feel, or energy efficiency of the replica.

ORS Optics Ready Cylinder Head

The **ORS Optics Ready** bolt carrier allows for the direct mounting of **RMR** standard optics. An included adapter plate also makes **RMSc** and **DeltaPoint Pro** mounts compatible, offering a wide selection of reflex sights to suit each user's preferences.

External hop-up with a wide adjustment range

The **Hop-Up** adjustment is quick and easy thanks to an external dial that requires no tools. Its wide adjustment range allows the use of BBs up to **0.40g**, making it easy to optimize range and trajectory stability.

An ideal base for customizations

Compatible with approximately **60% of parts** and **100% of Tokyo Marui Hi-Capa sets**, this platform offers vast potential for expansion. It provides an excellent foundation for players looking to develop a custom configuration while benefiting from already high-performance mechanics.

FAQ

Which optics are compatible with the ORS bolt head?

The ORS bolt accepts RMR standard sights directly. The included adapter plate also allows the mounting of RMSc and DeltaPoint Pro compatible models.

What is the advantage of the adjustable CNC Blowback Housing?

The GBB PR® system allows you to adjust the timing of the gas flow in order to customize the behavior of the replica, favoring either a higher rate of fire or better gas efficiency.

Can a CO2 charger be used?

No. This replica is not directly compatible with a CO2 magazine. The manufacturer states that the "Long Cutoff Delay Spacer" must be installed before use with this type of magazine.
