A simple spring-powered pistol for beginners, with a reusable mini target and 250 balls included.

The **BORNER EasySpring** is an entry-level **spring-powered air pistol** with a polymer body and synthetic grip. Its CO₂-free operation makes it simple and economical for **recreational shooting**. The reusable mini gel target and 250 steel BBs provide the essentials for getting started.

- **Brand:** BORNER
- **Model:** EasySpring
- **Type:** Spring-loaded air gun
- **Propulsion:** spring, without CO₂ cartridge
- **Caliber:** 4.5 mm (.177)
- **Ammunition:** steel BBs
- **Capacity:** 16 BB
- **Initial velocity:** up to 60 m/s
- **Weight:** 635 g
- **Structure:** polymer
- **Handle:** synthetic
- **Accessories included:** reusable mini gel target and a bag of 250 steel BBs
- **Supplier reference:** NVB107

A spring mechanism that gets straight to the point

The **BORNER EasySpring** operates with a spring mechanism and therefore requires no CO₂ cartridges. It is manually cocked before each shot. This intentionally simple design is ideal for those primarily seeking an **air pistol for recreational shooting**, without the need for numerous consumables.

A simple design with a synthetic handle

The polymer construction and **synthetic handle** perfectly suit the accessible positioning of this model. There's no sophisticated finish or pursuit of high-end features here: the overall design prioritizes simplicity for recreational use and a first foray into target shooting.

Performance levels suitable for beginners

With a claimed velocity of up to **60 m/s** and powered by **4.5 mm steel BBs**, this model is clearly geared towards short-range recreational shooting. Its 16-round magazine allows for multiple shots in quick succession, while still requiring manual cocking between each shot.

A mini target and 250 marbles included in the kit

The kit includes a **reusable mini gel target** and a bag of **250 steel BBs**. This content perfectly complements the entry-level approach: the user has everything they need to discover target shooting right from the start, without having to immediately add a target or a first bag of projectiles.

A model designed for occasional use

The spring-powered mechanism is particularly well-suited for occasional use: no gas cartridges are required, and the system is easy to understand. The **EasySpring** is therefore primarily aimed at those looking for a basic first air pistol, or simply a simple model for a few recreational shooting sessions.

FAQ

What type of user is a spring-loaded pistol like this one intended for?

This type of model is best suited for beginners and occasional recreational shooting. Its manual operation, simple design, and modest performance make it more appropriate for an initial introduction than for those seeking a more sophisticated air pistol.

What is the advantage of a spring compared to a model that operates on CO??

The spring eliminates the need to buy and manage CO? cartridges. However, the mechanism must be manually cocked before each shot. This solution remains particularly simple for occasional use.

Why is this kit suitable for starting out in target shooting?

The air pistol operates without CO? and the kit already includes a reusable mini gel target and 250 steel BBs. The user therefore has a simple set to discover the principle of air pistol shooting without needing to buy a lot of accessories right from the start.
