CA801	CARABINE BORNER FLEXSHOT ASH NOIR 4.5 mm CROSSE SYNTHETIQUE 12J	D	.177 (4.5 mm)	60	249	52	105	1600	109.00 € incl. tax

The lightweight multi-compression rifle for easy progression.

The **BORNER FlexShot** is a **4.5 mm caliber multi-compression air rifle** compatible with **pellets** and **steel BBs**. Its manual pumping system allows you to adjust the power as needed. Ideal for **recreational shooting**, training, and target shooting with excellent control.

- **Propulsion type:** Multi-compression (manual pumping)
- **Caliber:** 4.5 mm (.177)
- **Ammunition:** Steel BBs and diablo pellets
- **Capacity:** 60 BBs
- **Speed:** Up to 249 m/s
- **Weight:** 1.6 kg
- **Color:** Black

Adjustable power to suit your needs

The **BORNER FlexShot** uses a **multi-compression** system that allows for progressively increasing pressure through several pumping movements. This enables the user to adjust the power according to the shooting distance, target type, or ammunition used, while maintaining optimal control.

Compatible with two types of ammunition

This rifle accepts both **4.5mm diablo pellets** and **steel BBs**. This versatility allows for a variety of uses, from precision target shooting to recreational plinking sessions, depending on individual preferences.

Lightweight and pleasant to use

Weighing only 1.6 kg, it remains comfortable to shoulder, even during long training sessions. Its black synthetic stock offers good resistance to regular handling while ensuring a natural grip.

A rifle designed for recreational use

Easy to use and requiring neither CO₂ cartridges nor air bottles, this **air rifle** is an excellent choice for discovering recreational shooting, perfecting your technique or enjoying target shooting sessions with ease.

FAQ

How does the multi-compression system work?

Power is obtained through several manual pumping movements. The greater the number of compressions, the higher the energy developed, within the limits specified by the manufacturer.

Can this rifle fire pellets and BBs?

Yes. It is compatible with 4.5 mm caliber diabolo pellets as well as with steel BBs of the same caliber.

Should CO₂ cartridges be used?

No. Propulsion is entirely provided by the manual pumping system, without any additional consumables.
