A second generation DMAG redesigned to improve fuel supply reliability and optimize gas usage.

Double Eagle DMAG V2 M4 / N4 35 rounds : Second generation **Green Gas** magazine with alloy body and revised feed lips.
Its 35-ball capacity and updated internal components improve feed consistency and gas efficiency, including during cooling.

- **Brand: Double Eagle**
- **Range: DMAG V2**
- **Type: GBB** magazine for airsoft replica
- **Propulsion:** Green Gas
- **Capacity:** 35 marbles
- **Caliber:** 6mm airsoft BBs
- **Construction:** alloy
- **Design:** STANAG type
- **Compatibility: Double Eagle MWS AR15 / M4 GBB** replicas
- **Compatibility: Tokyo Marui MWS AR15 / M4 GBB** replicas and models of similar specifications
- **Generation:** Second generation DMAG
- **Color:** gray
- **Contents:** 1 charger

A completely redesigned second generation DMAG

The **Double Eagle DMAG V2** succeeds the original DMAG magazine with a revised internal design. The manufacturer has notably reworked the components related to the feeding and gas operation. The entire assembly remains housed in an **alloy** body that retains the characteristic

aesthetic of a STANAG magazine.

Redesigned feeding lips

Among the significant improvements is the redesigned **feed lips** . This modification aims for more reliable feeding of 6mm BBs in compatible MWS replicas. The system also remains compatible with magazines that meet MWS specifications.

35 marbles and operates on Green Gas

With a capacity of **35 6mm BBs** , this magazine combines BB storage and a **Green Gas** reservoir to power a compatible GBB replica. The internal components of this version have been updated to improve gas efficiency and maintain consistent operation even when the magazine is subjected to the cooling effect inherent in gas use.

STANAG format for MWS platforms

The alloy body features the classic lines of a **STANAG-type AR magazine** . This design is accompanied by announced compatibility with the **Double Eagle MWS AR15 / M4 GBB** platforms, as well as with the **Tokyo Marui MWS AR15 / M4 GBB** and replicas meeting similar specifications.

A charger designed to complement a GBB configuration

In the field, having several compatible magazines allows you to organize your setup around a single MWS platform. Here, the 35-round magazine format, the alloy construction, and the improvements made to the feeding and gas management systems position this second generation as a direct evolution of the first DMAG.

FAQ

Can this magazine be used with a Tokyo Marui MWS replica?

Yes. The advertised compatibility covers Tokyo Marui MWS AR15/M4 GBB replicas as well as models meeting similar MWS specifications. It is also compatible with Double Eagle MWS AR15/M4 GBB platforms.

What does the second generation DMAG offer compared to the first?

This second generation notably revises the internal components and feed lips. These modifications aim to improve the reliability of BB feeding and the efficiency of gas operation, particularly when the magazine cools down during use.
