A GBBR licensed by BCMAIR with EVO TDC hop-up, V3 mechanics and GUNFIGHTER equipment.

The VFC BCM MK2 11.5" MCMR EVO V3 GBBR combines the **M4 V3 GBB** mechanism with the click-adjustable and quickly removable EVO TDC hop-up. Its **10-inch MCMR M-LOK** handguard, GUNFIGHTER accessories, and licensed BCMAIR markings make up a compact and complete platform, offered here in a gray finish.

- **Brand: VFC**
- **Model: BCM MK2 11.5" MCMR EVO Standard Ver. V3**
- **License: BCMAIR** / BCM
- **Manufacturer reference: VF2-LBCM-MCMR-S-GY03**
- **Type:** GBBR airsoft replica
- **Caliber:** 6 mm Airsoft
- **Color:** gray
- **Operation:** Gas Blowback
- **Internal system:** VFC M4 V3 GBB
- **Power supply:** Top Gas / Green Gas HFC22
- **Firing modes:** semi-automatic, automatic, and safe
- **Power:** approximately 360 FPS
- **Magazine capacity:** 30 BBs
- **Length:** 710 to 790 mm
- **Internal barrel:** 275 mm
- **External Canon:** 11.5 inches
- **Handguard:** BCM MCMR M-LOK 10-inch CNC-machined aluminum
- **Hop-up:** adjustable, EVO AR GBB system
- **Hop-up adjustment:** TDC with rear click-lock screw

- **Hop-up chamber:** steel
- **Hop-up disassembly:** quick, without removing the outer barrel or handguard
- **Valve knocker:** V3 steel
- **Nozzle:** High performance V3, non-NPAS
- **Buffer:** heavy high-speed assembly
- **Upper:** BCM MK2 style
- **Flash hider:** BCM Compensator MOD0 in steel, style 5.56
- **Arming lever:** BCM GUNFIGHTER Mod 4X4 ambidextrous
- **Pistol grip:** BCM GUNFIGHTER Mod 2
- Gunfighter's tactical trigger **guard**
- **Back plate:** compatible with QD strap attachment
- **Stock:** BCM GUNFIGHTER Mod0 SOPMOD
- **Markings:** BCM engraved on the receiver, bolt carrier and magazine
- **Contents:** replica, 30-round gas magazine, long hex key, and EVO Hop-Up adjustment tool

A licensed BCM MK2 in grey finish

The **VFC BCM MK2 11.5'' MCMR EVO V3 GBBR** is offered here in a **gray finish** , as per reference VF2-LBCM-MCMR-S-GY03. The BCMAIR license authorizes the reproduction of the BCM markings present on the receiver, bolt carrier, and magazine.

The upper receiver adopts the **BCM MK2** style and is paired with an 11.5-inch outer barrel. The overall length varies from 710 to 790 mm, for a compact GBBR configuration built around the VFC M4 V3 platform.

BCM MCMR M-LOK 10-inch Handguard

The front section is equipped with a CNC-machined aluminum **10-inch MCMR M-LOK BCM** . The M-LOK interface allows for the use of accessories employing this standard while maintaining the characteristic architecture of the MCMR handguard.

A steel **BCM Compensator MOD0** completes this configuration. Several GUNFIGHTER components are thus integrated as standard rather than offered as separate equipment.

TDC EVO hop-up with click adjustment

The **EVO AR GBB Hop-Up** system adopts a TDC, or Top Dead Center, architecture. Its adjustment is made from the rear via a click-stop screw, offering progressive and easily quantifiable adjustments.

The hop-up chamber and its internal components are made of steel. The system benefits primarily from a quick-disassembly design: the inner barrel or the hop-up bucking can be removed without having to remove the outer barrel or the handguard.

VFC M4 V3 GBB Mechanics

This version is based on the **VFC M4 V3 GBB system** . The mechanics include a steel V3 valve knocker, a high-performance non-NPAS type V3 nozzle, and a high-speed heavy buffer assembly.

These components work in conjunction with the Gas Blowback cycle and the mechanical impulse produced by the moving cylinder head. The fuel supply is designed for **Top Gas or Green Gas HFC22** , and semi-automatic, automatic, and safety modes are available.

BCM GUNFIGHTER Commands

The equipment includes an ambidextrous **GUNFIGHTER Mod 4X4** charging handle, a Mod 2 pistol grip, and a tactical trigger guard specifically designed for the GBB system. This combination provides a consistent BCM configuration across all key handling interfaces.

At the rear, the butt plate incorporates an interface for a QD sling attachment. It is paired with a **BCM GUNFIGHTER Mod0 SOPMOD** , completing the equipment of this licensed version.

30-round magazine and EVO tools included

The replica comes with a **30-round BCM VFC M4 gas magazine** . The package also includes a long hex key for quick hop-up removal and a specific tool for adjusting the EVO system.

The inner barrel measures 275 mm and the hop-up is adjustable. The stated velocity is approximately **360 FPS** , although this value is presented as approximate in the provided specifications.

FAQ

How is the TDC EVO hop-up adjusted?

The EVO system uses a rear adjustment screw that operates in clicks. This design allows for incremental hop-up adjustments and counting of the different positions applied.

Can the hop-up be disassembled without removing the handguard?

Yes. The quick-release system allows you to remove the inner barrel or hop-up bucking without removing the outer barrel or handguard. A long hex key is included for this purpose.

Which BCM GUNFIGHTER accessories are fitted as standard?

This version notably receives a 10-inch MCMR M-LOK handguard, a MOD0 Compensator, an ambidextrous Mod 4X4 charging handle, a Mod 2 grip, a tactical trigger guard, a QD backplate, and a Mod0 SOPMOD stock.
