## A GBBR licensed by BCMAIR combining a 14.5-inch barrel, EVO TDC hop-up and V3 mechanics.

**The VFC BCM MK2 MCMR 14.5" EVO V3 GBBR** combines a 14.5-inch outer barrel with the **M4 V3 GBB** mechanism and the click-adjustable EVO TDC hop-up. Its **MCMR M-LOK** handguard, GUNFIGHTER accessories, and licensed BCM markings create a modular platform with a hop-up system that simplifies adjustment and maintenance.

- **Brand: VFC**
- **Model: BCM MK2 MCMR 14.5" EVO Standard Ver. V3**
- **License: BCMAIR** / Bravo Company Manufacturing
- **Manufacturer reference: VF2-LBCM-MCMR-M-BK03**
- **Type:** GBBR airsoft replica
- **Caliber:** 6 mm Airsoft
- **Color:** black
- **Operation:** Gas Blowback
- **Internal system:** VFC M4 V3 GBB
- **Power supply:** Top Gas / Green Gas HFC22
- **Firing modes:** semi-automatic, automatic, and safe
- **Power:** approximately 360 FPS
- **Magazine capacity:** 30 BBs
- **Length:** 786 to 865 mm
- **Internal barrel:** 275 mm
- **External Canon:** 14.5 inches
- **Upper:** BCM MK2 style
- **Handguard:** BCM MCMR M-LOK 10-inch CNC-machined aluminum
- **Hop-up:** Adjustable EVO AR GBB
- **Hop-up adjustment:** TDC system with rear click-lock screws

- **Hop-up chamber:** steel
- **Hop-up disassembly:** quick, without removing the outer barrel or handguard
- **Valve knocker:** V3 steel
- **Nozzle:** High performance V3, non-NPAS
- **Buffer:** heavy, high-speed assembly
- **Flash hider:** BCM Compensator MOD0 in steel, style 5.56
- **Arming lever:** BCM GUNFIGHTER Mod 4X4 ambidextrous
- **Pistol grip:** BCM GUNFIGHTER Mod 2
- Gunfighter's tactical trigger **guard**
- **Back plate:** compatible with QD strap attachment
- **Stock:** BCM GUNFIGHTER Mod0 SOPMOD
- **Markings:** BCM engraved on the receiver, bolt carrier and magazine
- **Contents:** replica, BCM VFC M4 30-round gas magazine, long hex key, and EVO Hop-Up adjustment tool

**Canon 14.5-inch and BCM MK2 architecture**

The **VFC BCM MK2 MCMR 14.5'' EVO V3 GBBR** features a **BCM MK2** -style upper receiver paired with a 14.5-inch outer barrel. This version measures between 786 and 865 mm in length and retains a gas-powered AR-type design.

The **BCMAIR** license allows for the reproduction of BCM markings on the receiver, bolt carrier, and magazine. The black finish and engravings contribute to the visual fidelity of this 14.5-inch version.

**BCM MCMR M-LOK CNC Aluminum Handguard**

The front section features a CNC-machined aluminum **10-inch BCM MCMR M-LOK handguard** . The M-LOK interface offers various mounting points for accessories using this standard, while maintaining the MCMR line's identity.

A steel **BCM Compensator MOD0** completes the barrel end. This configuration thus brings together several licensed BCM components directly on the replica.

**TDC EVO hop-up with click adjustment**

The **EVO AR GBB Hop-Up** system uses a TDC, or Top Dead Center, design. Adjustment is made at the rear using a click-stop screw, allowing for incremental adjustments and counting of the applied positions.

The hop-up chamber and its internal components are made of steel. A dedicated EVO adjustment tool is included with the replica for direct adjustment of this system.

**Quick disassembly of the inner barrel and hop-up bucking**

The EVO architecture was also designed to simplify hop-up modifications. The **275mm inner barrel** and bucking can be removed without first removing the outer barrel or handguard.

A long hex key is included for this operation. This design therefore reduces the number of parts to be disassembled when access to the inner barrel or hop-up bucking is required.

**VFC M4 V3 GBB Mechanics**

The system is based on the **VFC M4 V3 GBB** . This generation includes a steel V3 valve knocker, a high-performance non-NPAS type V3 nozzle, and a high-speed heavy buffer assembly.

The assembly works in conjunction with the **gas blowback** system's bolt cycle. It is designed to use Top Gas or Green Gas HFC22, with semi-automatic, automatic, and safe firing modes.

**Integrated BCM GUNFIGHTER equipment**

The configuration includes several **BCM GUNFIGHTER** components. The Mod 4X4 charging handle features an ambidextrous design, while the Mod 2 pistol grip and tactical trigger guard complete the main controls.

At the rear, the replica features a plate compatible with a QD sling attachment and a **Mod0 SOPMOD stock** . These components are integrated as standard and form a cohesive unit with the MCMR handguard and MK2 upper receiver.

**30-round gas magazine and accessories included**

A **30-round BCM VFC M4 gas magazine** is included with the replica. The stated velocity is approximately 360 FPS, a value presented as approximate in the model's specifications.

The pack also includes a long hex key for quick hop-up removal and the EVO adjustment tool. The replica thus comes equipped with the specific accessories needed to fully utilize the main functions of its hop-up system.

**FAQ**

**What is special about the TDC EVO hop-up?**

The EVO system uses a TDC architecture with a rear screw that operates by clicks. This allows for gradual adjustment while counting the different positions applied.

**Do you need to remove the handguard to change the inner barrel or the hop-up bucking?**

No. The quick-disassembly design allows access to the inner barrel and hop-up bucking without removing the outer barrel or handguard. A dedicated long hex key is included.

**What BCM accessories are originally fitted to this 14.5-inch version?**

It includes the MCMR M-LOK 10-inch handguard, the MOD0 Compensator, the GUNFIGHTER Mod 4X4 charging handle, the Mod 2 grip, the tactical trigger guard, the QD backplate, and the Mod0 SOPMOD stock.
