An RGB tracer in a compensating format, specially designed for handgun replicas.

The **Acetech Tracer Quadra S** combines three operating modes in a compact format: **Tracer** , **Spitfire,** and Combo. Its multicolor **Bifrost** mode enhances visual effects, while compatibility with red and green tracer BBs allows for various game configurations. Its **CNC-machined aluminum** construction combines a robust metal structure with a lightweight design of only 50g, for dimensions of 45 x 26 x 37 mm. The **14mm CCW** main thread meets the common standard for airsoft replicas, and the included **11mm CW** adapter expands mounting options. Supplied with a lock nut, Allen key, and adapter, this **Acetech** tracer provides a complete solution for equipping a compatible replica without the need for additional accessories.

- **Brand: Acetech**
- **Model: Quadra S**
- **Type:** Airsoft tracer
- **Modes:** Tracer, Spitfire Flame, Combo
- **Lighting effect:** Multicolored **Bifrost**
- **Compatible ball bearings:** red and green tracer balls
- **Material:** CNC aluminum
- **Thread:** 14 mm CCW
- **Adapter included:** 11 mm CW
- **Dimensions:** 45 x 26 x 37 mm
- **Weight:** 50 g
- **Color:** black
- **Contents:** plotter, 14 mm CCW to 11 mm CW adapter, lock nut, Allen key

Three modes to adapt the visual effect

The **Acetech Quadra S** offers three distinct configurations: **Tracer** , **Spitfire Flame** , and Combo. The first mode illuminates tracer BBs, the second produces a muzzle flash, while the Combo mode combines both functions. This design allows for quick adjustments to the visual effect depending on the desired configuration.

Multicoloured Bifrost Mode

The **Bifrost** mode adds a multi-colored lighting effect characteristic of Acetech markers compatible with this technology. It complements the classic marking and flame simulation functions to offer a more striking visual effect during airsoft games.

Compatible with red and green tracer balls

The system accepts both **red and green tracer balls** . This dual compatibility allows for greater flexibility in the choice of consumables, without limiting the tracer to a single color of luminous ball.

Compact CNC aluminum body

The structure is made of **CNC-machined aluminum** . Weighing only 50 g and measuring 45 x 26 x 37 mm, the unit remains remarkably compact. This size allows the plotter function to be added to a compatible replica without installing a lengthy accessory.

14 mm CCW thread and 11 mm CW adapter

The main mounting system uses a **14 mm CCW thread** . A 14 mm CCW to **11 mm CW** adapter is included in the package, allowing the plotter to be used with both interfaces. The locknut and Allen key required for mounting are also included.

A set delivered with its mounting accessories

The package includes the tracer, a 14mm CCW to 11mm CW adapter, a lock nut, and an Allen key. The user thus has all the necessary components for installation on a replica with one of the compatible threads.

FAQ

What is the difference between Tracer, Spitfire and Combo modes?

Tracer mode illuminates tracer BBs, Spitfire mode produces a light effect at the muzzle of the replica, and Combo mode combines these two functions in a single configuration.

On which threads can this tracer be mounted?

The main mounting uses a 14 mm CCW thread. The supplied adapter also allows installation on a compatible 11 mm CW interface.

Should only green tracer balls be used?

No. The system is advertised as compatible with both red and green tracer balls, allowing users to choose between these two types of consumables.
