A CNC aluminum plotter with three modes, mouth effect and 14mm CCW compatibility.

Acetech Quadra 14mm CCW Tracer Unit : **CNC-machined aluminum** tracer with three modes, muzzle effect simulation, and compatibility with red, green, and standard tracer BBs. Its 14mm CCW thread and included 11mm CW adapter facilitate integration with many compatible airsoft replicas. Its compact size and USB-C charging make it an ideal accessory for airsoft players looking to customize their replicas.

Box contents

- **Quadra**
- **M14(-) to M11+** adapter
- 1.5 mm Allen key
- M3 × 4 headless screw
- User manual

- **Brand: Acetech**
- **Model: Quadra 14mm CCW Tracer Unit**
- **Reference:** AC-PAT8000-B-001
- **Type:** Airsoft tracer unit
- **Construction:** CNC aluminum
- **Color:** black
- **Thread:** 14 mm CCW
- **Adapter included:** 11 mm CW to 14 mm CCW
- **Functions:** drawing and simulating mouth effect
- **Drawing modes:** 3
- **Ball compatibility:** red tracer balls, green tracer balls and standard balls
- **Charging:** USB Type-C port

- **Compatibility:** Most airsoft pistols with a 14mm CCW or 11mm CW threaded barrel
- **Contents:** Tracer, 11mm CW to 14mm CCW adapter, charging cable, user manual

CNC aluminum body

The **Acetech Quadra 14mm CCW Tracer Unit** is based on a **CNC machined aluminum** construction. This architecture provides the module with a metal casing suitable for installation at the end of the barrel on a compatible airsoft replica, while maintaining a discreet black finish.

Three modes: tracing and mouth effect simulation

The Quadra isn't just for illuminating BBs. It combines an **airsoft tracer** function and a **muzzle effect simulation** , with three operating modes available. This configuration allows you to adapt the visual display to the game and the type of BB being used.

The system supports **red tracer balls** , **green tracer balls** , and standard balls. This compatibility expands the possibilities for use without limiting the module to a single type of consumable.

14 mm CCW thread and 11 mm CW adapter

The main mount uses a **14mm CCW thread** , a common standard in the airsoft world. The kit also includes an **11mm CW to 14mm CCW** adapter, allowing compatibility with pistols that have this interface.

The advertised compatibility covers the majority of airsoft pistols equipped with a 14mm CCW or 11mm CW threaded barrel. The included adapter eliminates the need to purchase this part separately when the replica uses an 11mm CW thread.

USB Type-C charging

Charging is done via a **USB Type-C port** . The necessary cable is included in the packaging, allowing you to recharge the tracer without any additional accessories.

A kit delivered ready to be configured

The package includes the tracer, the 11 mm CW to 14 mm CCW adapter, the charging cable, and the user manual. All the advertised components for installation and charging are therefore included in the same package.

FAQ

Can this tracer be mounted on an airsoft pistol threaded with 11mm CW?

Yes, when it comes to a gun compatible with this standard. An 11 mm CW to 14 mm CCW adapter is provided to allow mounting the tracer on configurations using this thread.

Is it mandatory to use tracer balls with the Quadra?

No. The system is advertised as compatible with red tracer balls, green tracer balls, and standard balls. The effects obtained naturally depend on the function used and the type of ball loaded.

Is a thread adapter included?

Yes. The kit includes an 11mm CW to 14mm CCW adapter, designed to extend the tracer's compatibility to airsoft pistols using this interface.
