PCK3AD816	PACK DE 12 CHARLIE KIMAR CAL .50	D	.50 Air	5	16	16	25	1160	2 292.00 € incl. tax

Twelve semi-automatic 16 joule CO2 pistols with pressurization on demand.

This pack includes 10 pistols and 2 free **Charlie 1.50 pistols** in .50 caliber. Powered by a 12g CO2 cartridge, this semi-automatic model delivers 16 joules of energy. Its metal slide and barrel provide a substantial grip. The cartridge is inserted into the grip without being immediately pierced. A tap on the base pressurizes the cartridge at the desired moment, while an indicator at the rear of the slide shows the system's status. The two removable 5-round magazines are easily replaced using the ambidextrous magazine release located under the barrel. Each pistol comes with two magazines, a cleaning rod, and a multilingual instruction manual. 12g CO2 cartridges are sold separately.

Technical information: **(see video tutorial)**

- The CO2 cartridge is installed head down in the butt of the gun.
- To remove the cartridge, pull the sole downwards and unscrew. Then put a cartridge back in and screw it in all the way.
- The CO2 cartridge remains intact and under pressure until it is struck by a blow on the sole of the handle when the weapon is needed.
- The percussion mechanism is entirely metallic and particularly resistant.
- It is possible to fire several magazines (sold as an option) with a 12g CO 2 cartridge.
- The Charlie gun only uses spherical balls (not compatible with plastic-skirted steel balls).
- Delivered without CO2 sparklets, to be purchased as an option.
