- **Length with stock extended:** approximately 105.4 cm
- **Empty weight:** approximately 2.38 kg
- **Color:** black
- **Accessories included:** scope, bipod and speedloader

An airsoft sniper rifle replica with a tactical design

The **black WELL MB06 SR-2** features an original design that sets it apart from traditional sniper rifle replicas. Its silhouette combines a long barrel with a telescopic stock and pistol grip inspired by M4-type carbines.

This design allows for a **stock length adjustable to five positions** , adapting the replica to the player's physique and shooting stance. Its construction, combining polymer and metal components, helps to reduce its weight while maintaining a structure suitable for airsoft field use.

A spring-loaded Bolt Action operation

The **WELL MB06 SR-2** uses a manual spring-driven mechanism, also known as **a Spring Bolt Action** . The player must cock the bolt before each shot to compress the spring and prime the replica.

This device requires neither a battery nor a gas cartridge. The advertised speed of **440 to 450 FPS** corresponds to the performance figures provided by the manufacturer. Actual results may vary depending on the BB weight, operating conditions, and replica configuration.

A telescopic stock for customizable ergonomics

The **M4 LE-style stock** has five adjustable positions, allowing you to adapt the overall length of the replica. This varies from approximately 97.8 cm to 105.4 cm depending on the chosen position.

The ergonomic A2-type pistol grip provides a familiar feel for users of tactical replicas. This configuration allows for adjustment of the firing position while maintaining good maneuverability during movement.

A replica equipped with a scope and a bipod

This version of the **WELL MB06 SR-2** comes with a **scope** mounted on the top Picatinny rail. This makes target acquisition and framing easier when firing at long range.

The **bipod** mounted under the front of the replica provides additional support for firing from a resting position. It helps stabilize the entire assembly and limit movement while aiming.

Contents of the WELL MB06 SR-2 package

- **1 black WELL MB06 SR-2 airsoft sniper rifle replica**
- **1 magazine** of 27 BBs
- **1 riflescope** with mounting brackets
- **1 bipod**
- **1 speedloader** to facilitate loading the charger

FAQ - WELL MB06 SR-2

Does the WELL MB06 SR-2 run on battery or gas?

No. The WELL MB06 SR-2 operates with a spring-loaded mechanism requiring manual cocking of the slide before each shot. Therefore, it requires neither a battery nor gas.

Is the stock of the WELL MB06 SR-2 adjustable?

Yes. The replica has an M4 LE-style telescopic stock adjustable to five positions. Its overall length varies from approximately 97.8 to 105.4 cm.
