A short-axis brushless motor for electric airsoft replicas.

The Vanguard 31K is a short-axis brushless motor designed for electric airsoft replicas. Its CNC-machined aluminum housing incorporates positioning adjustments and an electronic controller with multiple protections.

- **Type:** Brushless motor for AEG electric replica
- **Format:** short axis
- **Version:** 31K
- **Housing:** CNC machined aluminum
- **Settings:** Adjustable motor height and width
- **Platforms indicated by the manufacturer:** AK, AR36/G36, AUG and SG55x

A brushless motor for AEG

The Vanguard is a brushless motor designed for electric airsoft replicas. Its CNC-machined aluminum housing features a top screw and side adjustment screws, while its front cover is removable.

Electronic controls and protections

The motor features an electronic controller and CNC-machined brass connectors. The manufacturer specifies protections against gearbox jamming, overcurrent and overvoltage, as well as temperature monitoring with automatic shut-off in case of overheating.

Short axle compatibility

Warhead Industries specifies AK, AR36/G36, AUG, and SG55x platforms for the short-axis version. Before installation, verify the motor format and configuration of the replica in question.
