- **Firing mode:** semi-automatic
- **Energy:** 0.72 joules
- **Speed:** 85 m/s (278 fps)
- **Capacity:** 28 marbles
- **Internal barrel:** 130 mm
- **Length:** 245 mm
- **Length with silencer:** 427 mm
- **Construction:** polymer (FPV)
- **Rail:** Weaver / Picatinny
- **Function:** dual action
- **Color:** black

A tactical replica in an imposing format

The **ASG MK23 Special Operations Gas 6mm** immediately impresses with its size and look, inspired by modern tactical pistols. With its included silencer and robust silhouette, this replica commands attention on the field. It's exactly the kind of model chosen for its tactical style as much

as for its effectiveness in recreational play.

Non-blowback gas operation

The **non-blowback** system prioritizes autonomy and consistent firing. Without a moving slide, gas consumption remains controlled and performance remains constant. In practice, this results in quieter firing and a particularly reliable mechanism for extended sessions.

Silencer included and extended barrel

The included silencer accentuates the Special Operations style of this replica while extending its overall size. Combined with the 130mm inner barrel, it contributes to good firing stability and a satisfying feeling of accuracy for **target shooting** or stealth-oriented games.

Adjustable hop-up to optimize trajectory

The **adjustable hop-up** system allows you to adapt the trajectory of the BBs according to the weight used. This feature improves stability and shooting comfort at medium range. With a power of 0.72 joules and a velocity of 85 m/s, the MK23 maintains balanced performance for **recreational airsoft** .

Picatinny rail and tactical configuration

The integrated Weaver/Picatinny rail under the barrel allows for the addition of compatible accessories such as a light or laser. This modularity provides a real advantage for customizing the replica to the player's preferences.

Polymer construction and dual action

Its **FPV (Full Polymer Version)** construction helps to keep weight down while maintaining good overall robustness. The **dual-action** mechanism ensures smooth and intuitive operation, particularly appreciated in dynamic gameplay.

Additional features

- **Range:** SportLine
- **Type of marbles:** Plastic BBs
- **Style:** Special Operations
- **Charger reference:** 14765
- **Use:** recreational airsoft
- **Included accessory:** silencer

FAQ

Does the MK23 Special Operations have a blowback function?

No, this replica operates without blowback in order to promote gas autonomy and noise discretion.

Is the silencer included with the replica?

Yes, the silencer is included and contributes to the characteristic tactical style of the MK23 Special Operations model.

Can accessories be added to this replica?

Yes, the integrated Weaver/Picatinny rail allows for the mounting of various compatible accessories such as a lamp or laser.
