The mu-mh-14 double plastic holster, ubc-02 attachment, with Universal automatic retention is intended for carrying a wide range of 9mm double column magazines for service weapons.

The double swivel case consists of two mh-xx cases (for charger) assembled on a special adapter.
The advantage of this solution is that it saves space on the belt.
The two cases pivot on the belt simultaneously, while their mutual position remains unchanged.
The adapter makes it easy to port on the right or left side.
The ubc-02 quick-release system allows it to be installed on the belt without having to unhook it.
The gap between the transported material is much smaller with this clip system.

- The case can be rotated around the belt by 360 degrees with 16 stop positions.
- Compatible with the soft system.
- Black color
