- Rifle gun armed by cannon rocker (break barrel).
- Black polymer stock, resistant, ambidextrous and ergonomic.
- Truglo fiber optic riser and handlebar, for fast aiming in a maximum of light conditions.
- 11 mm aluminum mounting rail with reversing damper for mounting a telescope or a red dot.

The IGT system in a few words:

IGT: insert gas technology - Gamo's technological revolution in the world of air rifles! the spring is replaced by a tube of inert gas, which allows constant effort during rearming, greater regularity, less vibration and therefore more precision!

- More speed and penetration (up to 380 m / s).
- Less vibration thanks to the cylinder of inert gas.
- Better accuracy and less pneumatic friction.
- Less friction wear, more longevity.
- Adapted armament, very soft (less friction between metals).
- Constant and durable power (the cylinder always delivers exactly the same power).
