CA13946	200 bar filling tube - bottle	Vente libre	89.00 € incl. tax

Tube de liaison pour remplissage des armes à air 200 bars

Intended to fill tanks with pre-compressed airguns (PCP).

- One side with no male screw compatible diving bottle 230 bars + bleed valve.
- One side with no female screw compatible carbines Gamo PCP & Evanix.

Use :

- Screw the hose tightly onto the bottle, screw in the filler pin provided with the gun at the other end.
- Fit the pin on the tank of the weapon.
- Close the hose bleed valve.
- Open the cylinder valve until the tank is filled to 200 bar.
- Close the faucet on the bottle.
- Open the hose bleed valve to empty the 200 bar air in the hose.
- Detach the pine from the weapon.
- It's OK, you can go shoot!

Note: during the first filling, it is sometimes necessary to start filling more suddenly to prime the valve of the tank of the weapon.
